

On 115-acres located in the rolling hills of Bath, Ohio, Crown Point expresses its mission through organic agriculture and educational programs that integrate four core values:

COMMUNITY

The Crown Point Community participates in furthering the common good with our brothers and sisters and all natural systems. We seek mutually beneficial relationships that foster dignity and responsible action on behalf of all life.

JUSTICE

Crown Point supports Justice for the human-Earth community by reaching out to the poor and voiceless and advocating for environmental restoration.

SPIRITUALITY

The Spirituality of Crown Point is grounded in the Catholic Dominican tradition with its dedication to truth and preaching. Crown Point's interfaith emphasis makes its programs open to all who share the commitment of restoring and preserving our planet.

SUSTAINABILITY

In the practice of Sustainability, Crown Point models how to live lightly on the Earth, neither depleting its resources, nor causing environmental impacts that will imperil future generations and their needs. Living to renew, rather than to destroy, the Earth.

Crown Point Ecology Center is:

An organic farm

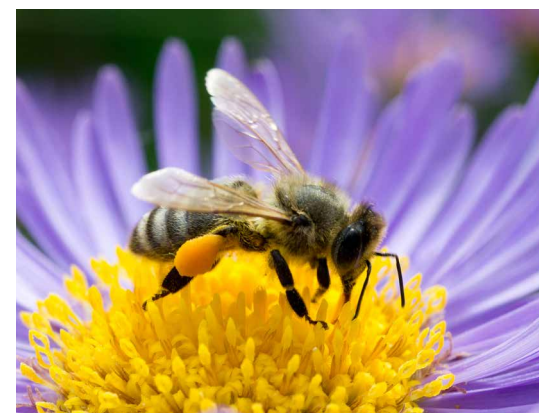

An education center

A living laboratory of ecology and sustainable land management

A place to renew your spirit

Green space that matters.
